

Far Eastern Memorial Hospital

Far Eastern Memorial Hospital (FEMH) is a tertiary referral medical center located in New Taipei City, Taiwan. Established in 1981, FEMH is a 1,400-bed institution with approximately 3,500 staff members. The Breast Cancer Center of FEMH operates under the Cancer Center framework and was established alongside the hospital's cancer program in 2004. It provides comprehensive, patient-centered breast cancer care through a fully integrated multidisciplinary model.

The Breast Cancer Center provides a full spectrum of services, including:

- Advanced breast imaging (mammography, ultrasound, MRI)
- Image-guided biopsy and pathological diagnosis
- Surgical management (including minimally invasive and oncoplastic techniques)
- Radiation therapy
- Systemic therapy (chemotherapy, targeted therapy)
- Postoperative rehabilitation and long-term follow-up

Our Clinical Facilities and Services

- One-stop multidisciplinary outpatient clinic
- Specialized "All-Female Physician Breast Clinic"
- Outpatient chemotherapy unit
- Cancer Resource Center for patient education and support

Multidisciplinary Team (MDT) Structure - This MDT approach ensures coordinated decision-making across diagnosis, treatment planning, and survivorship care. Which is composed of a well-coordinated team including:

- Breast Surgeons
- Medical Oncologists
- Radiation Oncologists
- Radiologists
- Pathologists
- Plastic and Reconstructive Surgeons
- Rehabilitation Specialists
- Oncology Nurse Specialists and Case Managers

The Breast Center diagnoses approximately 400–500 new breast cancer cases annually, reflecting its role as a major referral center in Taiwan.

Special Features and Highlights of Breast Cancer Treatment

1. Advanced surgical techniques: Minimally invasive breast surgery Endoscopic mastectomy Robotic-assisted breast surgery Oncoplastic breast surgery Axillary Reverse Mapping (ARM) for lymphatic preservation Robotic axillary lymph node dissection (ALND) Vacuum-assisted breast biopsy (VABB) for benign tumor excision
2. Innovative Radiotherapy: Stereotactic Body Radiotherapy (SBRT) Helical Tomotherapy
3. Precision Medicine and Novel Therapies: Boron Neutron Capture Therapy (BNCT) AI-assisted lymphatic mapping system
4. State-of-the-Art Imaging and Diagnostics: Digital Breast Tomosynthesis (3D mammography) MRI-guided vacuum-assisted biopsy Stereotactic-guided biopsy systems Ultrasound-guided core needle biopsy
5. Integrated and Patient-Centered Care Model: Multidisciplinary one-stop clinic "All-Female Physician Clinic" ensuring privacy and comfort for female patients Early postoperative rehabilitation programs Family-inclusive care approach
6. Quality Assurance and Clinical Excellence: Disease-specific breast cancer certification (Joint Commission of Taiwan, 2022 & 2025) Multiple SNQ National Quality Awards Leading national performance in Breast cancer screening

Hospital Visiting Schedule

September 17 (Thu)

Time	Activity
08:30-09:00	Commander' s Introduction(10min) 、 Company Introduction(20min)
09:00-10:30	Department of Imaging Medicine
10:30-11:30	Department of Hematology and Oncology
11:30-12:00	Breast cancer center
12:00-13:00	Lunch Break
13:00-14:00	Outpatient Chemotherapy Room
14:00-15:00	Cancer Resource Center
15:00-16:00	Ward (9G 、 10D)
16:00-17:00	Discussion Time

September 18 (Fri)

Time	Activity
09:00-12:00	Operation Room
12:00-13:00	Lunch Break
13:00-14:30	Department of Radiation Oncology
14:30-15:30	Rehabilitation Department
15:30-16:30	Social Worker's Office (Introduction to Cancer Support Group)
16:30-17:00	Ending
