

# Kaohsiung Medical University Chung-Ho Memorial Hospital

We focus on the diagnosis and treatment of both benign and malignant breast diseases. The treatment protocol include:

## 1. Diagnostic Procedures

- Mammography and breast ultrasound
- Core needle biopsy (CNB) / vacuum-assisted biopsy (VABB)
- Image-guided localization

## 2. Breast Cancer Surgery

- Breast-conserving surgery (lumpectomy)
- Mastectomy (total or skin/nipple-sparing)
- Oncoplastic breast surgery (tumor removal with cosmetic reconstruction)

## 3. Axillary Surgery

- Sentinel lymph node biopsy (SLNB)
- Axillary lymph node dissection (ALND)
- Targeted axillary dissection / lymphatic mapping

## 4. Reconstruction Surgery

- Implant-based reconstruction
- Autologous tissue reconstruction
- Fat grafting and aesthetic refinement

## 5. Multimodal Treatment

- Implant-based reconstruction
- Autologous tissue reconstruction
- Fat grafting and aesthetic refinement

Breast cancer treatment is multidisciplinary and we also collaborates with departments such as Radiation Oncology, Pathology, Plastic Surgery, Hematology, Diagnostic radiology etc.

# Special Features and Highlights of Breast Cancer Treatment

- Comprehensive breast care center in Taiwan
- One-stop service: screening → diagnosis → treatment → follow-up
- Multidisciplinary approach
- Expertise in minimally invasive, oncoplastic, and reconstructive surgery
- Active in research and education

## Hospital Visiting Schedule

### September 17 (Thu)

Time	Activity
09:00-10:00	Surgery
10:00-11:00	
11:00-12:00	
12:00-13:00	Lunch Break
13:00-14:00	Surgery
14:00-15:00	
15:00-16:00	

### September 18 (Fri)

Time	Activity
09:00-10:00	Outpatient clinic TOUR
10:00-11:00	
11:00-12:00	Lunch Break
12:00-13:00	
13:00-14:00	8A ward tour
14:00-15:00	Cancer center
15:00-16:00	Cancer center
